Peer Evaluation Form for Group Work

Group number_____
Your name _____

Write the name of each of your group members in a separate column. For each person, indicate the extent to which you agree with the statement on the left, using a scale of 1-4 (1=strongly disagree; 2=disagree; 3=agree; 4=strongly agree). Total numbers in each column.

Evaluation Criteria	Member: Yousif Al-dakoki	Member: Sachin Aingaran	Member: Abdelrahman Eissa	Member: Varrshan Preshanthan	Member: Sanjay Raveendran	Member:
Attends group meetings regularly and arrives on time.	4	4	4	4	4	
Contributes meaningfully to group discussions.	4	4	4	4	4	
Completes group assignments on time.	4	4	4	4	4	
Prepares work in a quality manner.	4	4	4	4	4	
Demonstrates a cooperative and supportive attitude.	4	4	4	4	4	
Contributes significantly to the success of the project.	4	4	4	4	4	
TOTALS	24	24	24	24	24	

Feedback on team dynamics:

1. How effectively did your group work? (List at least 3 things)

When we saw a need to change our plan mid-sprint (users needed data portability and we brought “CSV Export,” SCRUM-28, into the active sprint), we did. The deviation didn’t derail our progress.

We worked well as a team by dividing tasks cleanly across a 3-layer architecture: the presentation layer (aka the UI), the business logic (scraping and auth), and the persistence layer (SQLite). Members were able to work in parallel, and no one was constantly blocking anyone.

Other reason for our \ success came in parallel with some pains of working in a shared monolithic Next.js repo. We had trouble integrating and producing a working product before the deadline, but we all managed to push through and complete it.

2. Were the behaviors of any of your team members particularly valuable or detrimental to the team? Explain. (List at least 3 things)

Abdelrahman handled many of the backend dealing with data normalization and setting up NextAuth authentication flows.

Yousif's hardwork was a major asset because of the fact that he tackled the core scrapping engine and built out the catalog and data views

Sanjay, Varrshan, and Sachin ability to help keep things orginized by helping with the UI, to the test cases and documents, while also providing support for the project as a whole

3. What did you learn about working in a group from this project that you will carry into your next group experience? (List at least 3 things)

The Importance of Unified Architecture: We noted that if we have a clear stack in front of us our work would've gone more smoothly

Handling Shared Resources in Git: We learned the importance of manging our merging and communicating what we add to our github

Embracing Scope changes: We learn that our estimates are just estimates and that things will change and we have to move around and adapt to the changes
